(Image credit: Android Central / Andrew Myrick) When it comes to Android tablets, it's tough to argue that the Samsung's Galaxy Tab S8 series the cream of the crop. Not only can you sit back and enjoy the beautiful displays, but Samsung DeX unlocks a true laptop-like experience powered by Android. In recent years, we've seen Samsung and Microsoft also team up to provide a more cohesive experience for Windows users, and that trend continues with the Galaxy Tab S8. If you need some extra screen real estate, you can finally turn your tablet into a secondary monitor with the help of Second Screen. Before the Galaxy Tab S8, you could use third-party solutions such as Super Display or Microsoft's built-in "Projection" feature. However, these aren't always reliable. With the latest crop of Galaxy tablets to be released, there's a new app that Samsung released on the Microsoft Store to make the integration with your Windows computer even more seamless. In order to get started with your Tab S8 and Windows computer, there are a

On your Windows PC, select the name of your tablet.(Image credit: Android Central)(Image credit: Android Central)In a perfect world, that would be the end of this tutorial, and you will have a perfect secondary monitor to use with your Windows PC. However, you might come across a situation where there are black bars that line the top and bottom of your tablets display. This can be remedied, but you will need to tinker around with the Second Screen app on Windows first.From the Second Screen app, you'll notice that there are three different options available:Cast panel - Go to the Cast panel to allow touch or S Pen input on your tablet.Project panel - Go to the Project panel to change the display mode.Display settings - Go to Display setting to change the aspect ratio of your tablet to make it fill the full screen.(Image credit: Android Central)As you might have guessed by now, you'll want to jump into the Display Settings on your Windows PC to get rid of those black bars. Clicking that button will take you into the display settings for your computer, and includes the Galaxy Tab S8. 1. Select your tablet's display outline at the top of the page. This can be identified by pressing the Identify button in the bottom right corner.2. With your tablet select, scroll down until you reach the Scale & layout section. 3. Click the dropdown next to Display Resolution. 4. Select 1920 x 1200. 5. When prompted, click the Keep Changes button.(Image credit: Android Central)(Image credit: Android Central)After a moment, the screen on your Galaxy Tab S8 will change, and the black bars will be removed. In the event that this doesn't work for you, you can play around with the different available options until the right resolution is selected based on your device. Turn your Windows setup into a productivity powerhouseWhile Apple fans have the luxury of Sidecar with the iPad and macOS computers, this is the closest that we can get on the Android and Windows side of things. Being able to turn your Galaxy Tab S8 into a secondary display for your laptop can help to supercharge your productivity. Nothing really beats being able to have more screen space when you're trying to get work done on your various devices. And best of all, it just goes to show that there are plenty of reasons why even the best Android tablets are still pretty darn useful, even if Android app support still isn't quite there yet. Something went wrong. Wait a moment and try again. There are many different tablets available these days which means there is a lot of choice but it can often be quite difficult to sift through the mountains of shiny new tablets to find the best 8-inch tablet for you.Tablets tend to come in many different shapes and sizes, each claiming to offer something better than the rest.
